

Double-Take[®] Solution Suite

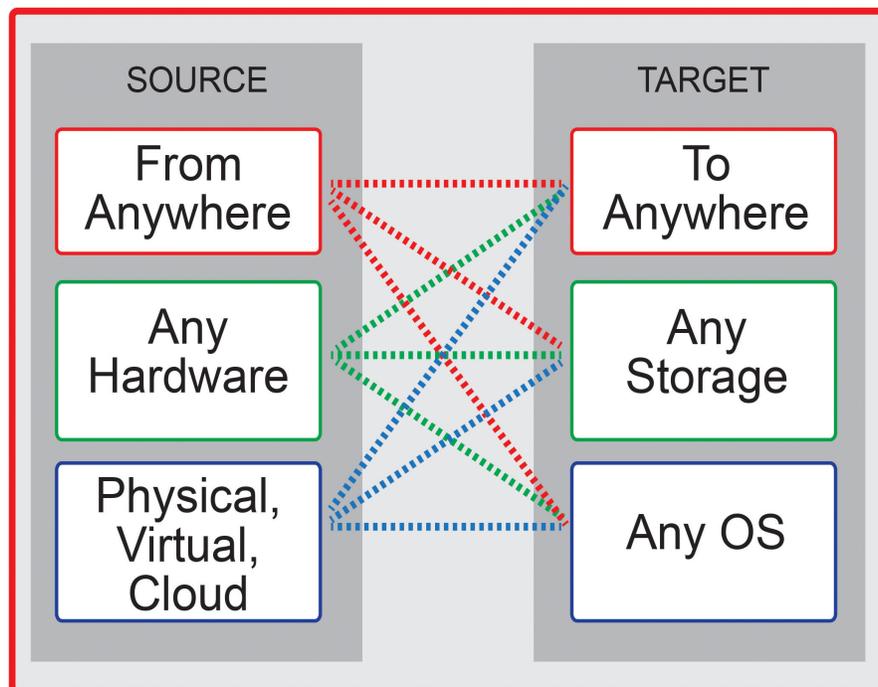

A critical element in a complete high availability and disaster recovery solution that protects all of your data and applications

Double-Take is the first and only high availability, disaster recovery and migration solution suite to offer agentless and agent-based protection options for physical, virtual or cloud servers. It also provides total workload mobility for predictable, near-zero downtime migrations.

Businesses of all sizes can take advantage of full-scale protection at an affordable, everything's-in-the-box price. Double-Take is hardware independent and bandwidth efficient, allowing use of existing infrastructure and the freedom to scale with whatever you build in the future.

Complete, Flexible Protection in Any Environment

Benefits

Unrestricted anything-to-anything protection

Streamline your HA/DR strategies with one solution that works across multiple operating systems, hypervisors and clouds.

Complete protection for physical, cloud and virtual servers

If you can't afford for your critical applications and servers to be down, Double-Take Availability offers real-time protection and instant workload recovery on any combination of physical, cloud or virtual servers. You'll get better application availability with our patented technology which allows flexible, granular recovery for files, directories, and entire servers.

One definitive, unified solution suite with no add-ons necessary

Whether you are protecting specific files or entire applications and servers, Double-Take has a solution to meet your needs. With time saving features such as auto-provisioned virtual recovery machines and cost saving features like implementing Windows Server Failover Clustering without shared storage and across sites, Double-Take gives IT admins and CFOs a reason to smile.

Anything-to-anything workload mobility

Moving workloads doesn't have to be a white-knuckle experience. Double-Take Move migrates complete workloads between any combination of physical, virtual and cloud servers in real time, with near-zero downtime and minimal disruption of your production systems.

Reliable disaster recovery with minimal infrastructure investment

Double-Take DR allows you to protect entire servers, including their system states, without needing to have in-depth understanding of the applications running on each server. And because it is hardware, hypervisor, and platform independent, Double-Take DR is the optimal solution for cloud-based disaster recovery for Windows servers.

High-value, affordable solution

Vision Solutions is the global leader in multi-platform IT business continuity solutions. Our trusted solutions work on your existing hardware, storage and WAN infrastructure and are bandwidth efficient - you won't need to buy special hardware to protect your servers.
